Skolaro

Introduction

Skolaro is designed by working closely with stakeholders of educational organizations to solve key problems through modern technology solutions. Our team of 100+ young and passionate full-time professionals is fully dedicated to the betterment of the platform and better customer experience. Our relentless efforts to innovate and bring the best of technology at a widely affordable price are putting them in a different league than others.

Skolaro was launched back in 2012 with an idea to provide an advanced and easy-to-use software system to the schools, colleges and educational institutions. It was launched with the objective of allowing institutions to manage their day to day functions effectively.

The 50+ Modules available in the Skolaro software gives you major tools required to manage school activities effectively and in a robust manner.

Vision

Our vision is to create innovative technology solutions to empower all the educational institutions and digitize education globally. Skolaro is an enterprise solution built for schools to help school owners and administrators improve productivity and manage their schools with ease.

Mission

At Skolaro, we are on a mission to help schools progress better and improve their turnover by digitizing the end to end activities of the schools and making teachers more productive on their day to day administrative tasks and at the same time improving the levels of parental involvement through better parent-teacher communication.

Skolaro

We can give you 100 reasons to use Skolaro!

Skolaro

Skolaro School management software is a comprehensive software to fulfill all the needs of a school or any other educational institution. It helps in simplifying and streamlining the chaotic and time consuming processes of a school and any other educational institution. From the centralized enquiry management system to capture & convert the enquiries better to rolling out the documentations of any student, it has all the features/modules which will help any school to run effectively. Skolaro has a user-friendly dashboard and easily accessible modules to navigate through. Skolaro can be accessed by teachers or other staff members who are not much tech savvy too as it is very simple to operate.

All in One Solution for your School!

Why you need to buy an ERP solution for your School?

AUTOMATED SCHOOL ADMINISTRATION

Whether it’s the admission process or employee data, their attendance status or controlled role-based access to student records, the school administration is well-equipped to organize everything. If you have enough experience as an educator, you must be aware that the strength of your administration is directly proportional to the school’s productivity, a good learning environment for students and a healthy, tension-free environment for staff.

Skolaro

PARENT-SCHOOL CONNECTION

With school management software, parents can find themselves involved in their child's academic and overall performance up close. They can have easy access to child's grades, attendance, discipline and much more. Parents can closely monitor their child's curricular and extracurricular performance and make informed decisions for their child's future.

- Payroll Management
- Accounting System

Few of the modules to automate your school!

Examination Management Software

Skolaro helps in automating the whole examination process and conducting the examinations effortlessly. It also help in creating report cards and automate grade generation too.

Admission Management System

Skolaro help in the end to end admission process of any school, right from generating custom enquiry form, collecting enquiries through different sources, avoiding any leakages as it gives complete transparency on how many enquiries were received from which source and the status of these enquiries too.

Skolaro

Skolaro

Inventory Management

Skolaro Inventory Management system allows for both item and vendor management and this application smartly handles sales and returns of goods across all departments in an Institute.

ACADEMICS MANAGEMENT

If you're looking to manage all the academic activities in an organized and effective manner, you can find it in Skolaro. Not only you can arrange the classrooms, live classes, timetable, material sharing, diary, etc., you can also plan lessons without any hassle.

DATA MANAGEMENT

Managing data when you have tons and tons of it is one of the most difficult tasks if done offline. Manual labour is bound to be sprinkled with errors. That's why the Skolaro school management system has integrated data management software with which you can manage records, files, classes, subjects, teachers, etc. as per your need.
